Continuation of Disposition of Claims: Claims subject to restriction and/or election requirement are 1-8,12-21,26-35,40-42,44-47,49-52,54-58,60,61,65-75 and 80.

Art Unit: 1623

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, 12-21, 26-35, 40-42, 44-47, 49-52, 54, 71, 74, 75, and 80, drawn to starch which exhibits freeze-thaw stability and compositions thereof, classified in class 536, subclass 102.

Group II, claim(s) 55-58, drawn to genetically modified plant cells, classified in class 435, subclass 410.

Group III, claim(s) 60, 61, and 70, drawn to a genetically modified plant, classified in class 800, subclass 295+.

Group IV, claim(s) 65-69, 72, and 73, drawn to a method for making a transgenic modification of a plant, and to a method of making starch which comprises transgenic modification of a plant, classified in class 800, subclass 284.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons. The starch does not constitute a special technical feature because it does not represent an advance over the prior art. AHAMED et al. (U) (see pages 100-102 and Figure 5), WURZBERG et al. (AA) (see column 3

Art Unit: 1623

and Table I), and YASUI et al. (V) (see page 133) all appear to teach starch within the scope of Group I, and which can be made using the cells, plants, or methods of Groups II-IV, respectively. No other possible special technical feature is apparent.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Papers relating to this application may be submitted to Technology Center 1600 by facsimile transmission.
